SLS500B Leverage Squat

Built on a rock-solid 11-gauge steel foundation, the Body-Solid Pro Clubline SLS500B Leverage Squat Machine delivers the raw power of heavy free-weight squats with the enhanced safety of a precision-guided commercial machine.

The SLS500B's biomechanically optimized design protects the spine while maximizing leg and glute recruitment, and features an integrated calf block for complete lower-body versatility.

Weight: 398 lbs.
Dimensions: 74"L x 61"W x 67"H

Special Features

- Biomechanically correct angled squat platform
- Rounded Calf Block provides extra range of motion
- Oval 11 gauge steel frame
- Olympic plate storage horns
