CABLE CROSS

Our G502 Cable Cross is a full-size commercial cable cross that extends 150" wide. Cable crossovers are a great exercise for targeting the chest muscles while also activating your shoulder, back, and core muscles. Our cable cross is commercial grade and its components are made for club use and built to last a lifetime. The main frame uses high strength 4"x2"x0.12" oval pipes and has an electrostatic powder coat finish to ensure maximum adhesion and durability.

The machine comes equipped with multi grip pull up bars with 3 different grip options for users. These handle grips are made of a durable urethane composite and remain comfortable on user hands even for extended use. The unit comes with a dual 220lb weight stack and cable handle attachments. Additionally, the machine has fiberglass-impregnated pulleys which feature sealed bearings and standard rubber feet to protect the base of the frame and prevent the machine from slipping. This machine is commercial grade and rated to hold over 1000lbs

Dimensions
151" x 28" x 91"

Weight
969lbs

Weight Stack
220lbs *2; Upgradeable to 340lbs *2.
