

Leverage Premier - Standing Calf Raise

The Nautilus Leverage Standing Calf machine targets both the inner and outer (gastrocnemius and soleus) calf muscles, with a greater emphasis on the gastrocnemius due to the extended leg position, making it ideal for building overall calf size, strength, aesthetic definition, and athletic performance. Engineered with a curved foot platform for optimal hyperflexion and reduced foot pressure, swivel shoulder pads for comfort, and a precise nearly 1:1 weight ratio. With a 540 lb weight capacity and integrated weight plate storage, it combines performance, durability, and convenience. Perfect for any fitness facility and designed to be the ultimate solution for calf muscle development.
